

Innovative resources for dynamic educators!

Welcome to our Catalogue!

edtech design and manufacture
visually stimulating education
resources for schools...

**Our motivational and fun products help deliver the
primary curriculum and are aimed at children
with a wide range of abilities.**

Edtech was founded in March 1990 to create classroom resources that children would find fun as well as educational.

We were the first company in the UK to introduce a wide range of high quality, low cost screen printed plastic resources to schools as a durable alternative to laminated card resources used by other companies. All of our products are designed and manufactured to a very high standard to ensure that they are suitable for continuous and vigorous use in busy classroom. As the majority of our products are made from durable plastic, they are also ideal for outdoor use.

Edtech offer practical resources that make learning fun. We have an excellent team of designers, production engineers and customer service staff who contribute to our success. From early years to phonics, we have the resources to assist children to progress with their learning.

We have been at the forefront of product development of educational resources for many years. We keep our finger on the pulse of education and work very closely with educational advisors and teachers to ensure that our products are not only child friendly, but also tailored to the National Curriculum and other Government led strategies.

We also offer an OEM service whereby we can create products to your exact specification. Simply come to us with an idea and we will take care of all your design and manufacturing requirements.

Number Range

Our number range covers a variety of subject areas, from basic number recognition to the four operations and includes the 12 times table.

Research shows that black printed onto yellow material optimises visual clarity, and for that reason, many of our products are presented in this way. As with the majority of our range, many products in this category are made from high quality, no tear plastic, which makes them durable and suitable for use year after year.

Number Essentials Class Pack

A fantastic Number Kit suitable for 30 children featuring:

- 3139704 Pupil Counting Tubes x 3 packs (30 tubes)
- 3140204 Small Beadstrings 1-20 x 30

Number Rods and Workcards.

This 250 piece set comprises lengths of plastic rod from 1cm to 10cm, in ten corresponding colours. Supplied with 16 A5 laminated colour workcards. Colours may vary. Longest rod 100mm x 10mm x 10mm

3107901 Pack 1

Place Value Range

This ever popular range consists of flips, counters, arrows and dice, all of which assist with the teaching of place value - from the basics of KS1 progressing through to UKS2.

Products are instantly recognisable due to the colour coding which runs throughout the range; hundreds are always green, tens are always yellow etc. The arrows and flips are made from no tear plastic and magnetic vinyl, which makes them long lasting and durable. Each product can be used on its own, but when used in conjunction with others in the range, understanding increases tenfold.

3124809 Complete Set

Number Lines

Number Lines are a fantastic teaching resource and a trusty favourite in the classroom!

As they are used over and over again for an abundance of activities, our aim was to produce high quality, durable number lines. Our number lines are made from no tear PVC, a longer lasting alternative to laminated card versions, and they benefit from being flexible and easy to wipe clean .

Our range includes a variety of number line designs from basic to negative numbers and fractions. We have also designed a selection of colourful character number lines to engage younger children.

Colour Coded Number Lines

Showing numbers -9 to 109, these 12 colourful number strips have many uses within the classroom. Arrange in one long number line or place one under another to form a grid of numbers. Can also be used to show patterns and sequences by stepping the start of the lines. Pack of 12 strips. 40 x 430mm.

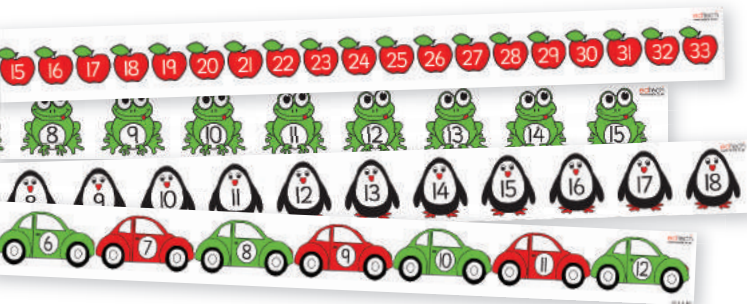

3126902 Pack 12 Strips

Odd and Even Caterpillars

Each of these number lines is double sided - printed with numbers on the front and write n wipe on the reverse. 5 different kinds 0-5, 0-10, 0-15, 0-20 and 0-25. One of each kind teacher size, 5 of each kind pupil size. Pack of 30. Teacher Size: 800 x 160mm, Pupil Size: 430 x 60mm.

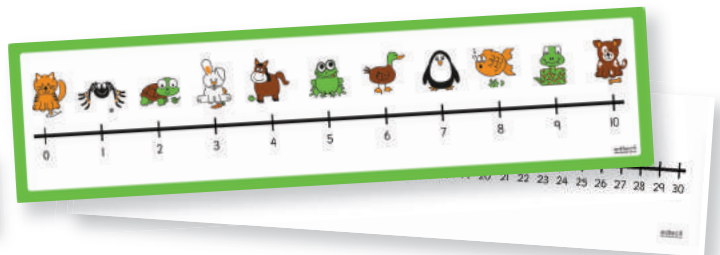

3127107 Pack 30

Character Number Lines

Write n Wipe

We know that write and wipe boards are used over and over again in classroom, that's why all of our boards are made from high quality, flexible, no tear PVC! Our huge range includes blank, letter formation and lined boards to name a few. We have recently introduced blank and lined boards in a tinted material to enable pupils with visual stress to comfortably use these resources without the negative effect that glare can have.

BEST SELLER!
